

## Special Consolidated Shipping

We have a solid reputation for services that meticulously and flexibly fulfill customer specifications

### Special Consolidated Shipping

We sort and deliver the valuable cargo our customers entrust to us by destination at each center. This makes shipping more efficient and less expensive compared to individual shipments.

#### Regularly scheduled shipments

We pick up anywhere, at any time, in any amount according to the customer's requirements. We provide a range of services, including deliveries on specified dates and at specified times.

#### Cash-on-delivery shipping

We collect payments when the merchandise is delivered for our department stores, mail order and online retailing customers. We manage customer payment slip numbers online.

#### Medical supply shipments

We provide dedicated joint medical supply shipping services in the six Tohoku prefectures, using a cross-docking scheme to deliver products from nationwide medical supply manufacturers to wholesalers around the Tohoku area at fixed times. Wholesaler consignees whose shipments were previously delivered piecemeal are now able to aggregate their shipments and boost their customer satisfaction levels.

#### Small-lot shipments

Shipping in small lots is convenient and easy because reliable, speedy pickups and deliveries are done using special containers and vehicles.

#### Chilled shipments

We offer a reliable service in partnership with Japan Post, using their refrigerated Yu-Pack service for refrigerated shipments.
