

Daiichi

Other Kinds of Transport

We offer high-quality transport options and services that accommodate customer requests quickly, safely and reliably

International Freight Transport (forwarding)

We undertake the full range of trading-related tasks related to imports and exports. Using our bonded warehouse in Yamagata, and depending on the location where international freight is handled, we provide a variety of services related to exports, storage and transport. Please also consult us about our door-to-door transport services between Japan and other countries.

JITBOX Charter Service

The JITBOX charter service is a new type of charter delivery service offered in single-box increments. Valuable freight is protected inside the sturdy steel frames of roll box pallets. We handle frequent and small-lot deliveries with charter transport deliveries in units of 1.8 m³ and less than 600 kg. We securely transport the required items at the required times and in the required amounts.

Charter Transport

We deliver direct to the destination via charter vehicle, without transshipment or consolidation with cargo from other customers. There are also cases when single vehicles make stops at several locations for parts procurement pickups. We provide vehicle models to suit our customer requirements, and pick up and deliver at the designated times. This service is appropriate for products that should not be consolidated with other cargo.

Air Transport

We provide lightning-fast transport through our combined air network and meticulously constructed ground network. We deliver all kinds of items—from fresh food products to fashion wear, documents, news film, works of art and high-tech products—with our failsafe service system.

Transport for Moving House and Relocating Offices

Our specialized staff handles every detail related to packing, shipping and installation for everything from moving to a new home to major office relocations.

Transport with Specialized Vehicles

We furnish specialized vehicles and shipping services for all kinds of customer requirements and contents, including petroleum, liquefied gas, cash, securities, meat and cement.

Air transport for speedy handling

Charter transport for direct deliveries to customers
